

# Doing My Part TO GROUND THE DRONES

There are over 1000 different kinds of drones, manufactured in 39 countries. Some fit in the palm of your hand, launched by sling shots; others are so big, they have to fit sideways in an airplane hanger. Most are smaller, lighter, “cheaper” than traditional bombers, costing an average of \$5 million instead of the \$175 million. They can hover or fly in the air for 24+ hours.

There are several ‘tenets’ working together to make these drones happen: these are the ‘tenets’ we will address:

## **BASES of Operations: Air Force Bases at Creech, Hanover, &?**

We intend to do on-going protests at this AFB and urge others to organize in their local communities at AFB's where DRONES are invading and propagating swiftly.

**CREECH AFB, Indian Springs, Nevada** This Air Force Base is located 25 miles north of Las Vegas in the striking Mohave Desert. It is also a stone's throw from the old above-ground nuclear testing site. This is where most of the drones are operated from, and where soldiers learn to fly them. Indigenous Peoples, the Nevada Desert Experience, the Nevada Peace Movement all work to rid the desert of this horrific continuing and escalating destruction paid for by our tax dollars. There is a wonderful Goddess Temple there that will house women activists. One day this could expand to a Women's NO DRONES Encampment.

## **OPERATORS: Air Force and Marine Pilots**

DRONES couldn't fly without the soldiers operating them. We hold weekly protests at recruiting stations and call on you to do so in your home town also!

**WEDs & THURs, noon – 1:30pm MRS (Marine Recruiting Station), 64 Shattuck Square Berkeley**

Here is where our vulnerable youth are recruited to become pilots, learning how to fly manned and unmanned bombers. These youth need to hear our voices, to engage in dialogue, to hand out materials for their information. Come stand with us on Wednesdays, or pick your own day and time. The MRS is open 5 days a week, 8:30am until 5:00pm, Saturdays 9:00 until 3, and by appointment!

**MANUFACTURES** Ryan Aeronautical Center, Northrup Grumman Corp. - San Diego, Tele Air International - Oxnard, CA – are only 2 of the places we know of that manufacture these assassins. We will protest on our way to Creech

**PUBLIC & MEDIA** Few are aware let alone willing to take action against the DRONES. We will get media attention & inform the public and urge you to also print out flyers, hold protests and press conferences, help get the word out about this assassins.
